

## AMMO BOWL FEEDER 1000 DATA SHEET

EST. 1978

ISO-9001

Heron's **Ammo Bowl Feeder 1000** is an ammunition collator used to feed large amounts of rounds in the correct orientation onto Heron's Autosealer<sup>®</sup> 5200 series of ammunition sealing machines.

**Product Part #:** 110020074

### **Features:**

- High capacity; Capable of easily and continuously feeding 5200 series fast outputs
- Automatically and consistently aligns and orients rounds before entering the sealing assembly line
- Feed multiple calibers using the same base unit; Easy tooling changeover when sealing different calibers or cartridges
- Adjustable feeding rates up to 240ppm (caliber dependent)
- ZigZag sensors automatically detect low and high volume
- Adjustable bowl angle
- Solid stainless steel and aluminum construction

### **Specifications:**

- Power Requirement: 24V DC
- PPM / Output Range: Up to 240ppm (caliber dependent)
- Weight: 80lbs (36.3 kg)
- Capable with calibers up to 338 Lapua Magnum

### **System Includes:**

- Bowl with diverter arms, lid and mounting base
- Motor

### **Available Options:**

- Caliber specific tooling (Dial, ZigZag and Discharge Block)

### **Replacement Parts:**

- Magnetic Lid: Part # 106021911
- Bowl Motor/Gearbox: Part # 102-393
- Dial Spacer: Part # 106022104

### **Warranty:**

- Standard 1 year from purchase date
