Hernon Manufacturing Reflects on a Year of Remarkable Achievements

Sanford, FL – January 2024 - Hernon Manufacturing Inc. celebrates a year of exceptional growth, recognition, and innovation in 2023. The company experienced substantial development in 2023, with notable increases in sales across key product categories, including UV Fog, Ammo Sealant, Equipment, and Nuts & Bolts. As a result, Hernon achieved more than 10 percent business growth and welcomed several new team members into the Hernon family.

In its nearly 50-year history, Hernon Manufacturing has expanded its product portfolio to encompass over five thousand unique formulas for anaerobic adhesives, cyanoacrylates, epoxies, acrylics, UV curing adhesives, and sealants. Serving as a comprehensive dispensing solution provider, Hernon also designs and manufactures precision dispensing systems catering to diverse industries, from ammunition to automotive.

In June, Hernon Manufacturing received national acclaim from the U.S. Secretary of Commerce, being honored with the prestigious E-Star Award. This distinguished symbol of excellence is granted to entities that make significant contributions to the expansion of U.S. exports. Hernon is one of only seven U.S. companies to receive this accolade, recognizing its sustained commitment to export expansion efforts that contribute to the U.S. economy and job creation.

In October, Hernon Manufacturing proudly accepted two industry awards, showcasing its global impact and technological advancements. The first award came from NASBITE International, recognizing Hernon as an "Outstanding Exporter 2023" for its significant contributions to global business training and education. The second award, presented by Mexico Technology Awards, celebrated Hernon's Ultrabond Sealant 721 as a groundbreaking innovation driving technological advancements in the region.

These accolades highlight the relentless efforts of the Hernon team and the company's commitment to delivering high-quality, innovative solutions to its customers. With a focus on innovation, quality, and customer satisfaction, Hernon Manufacturing has established a global presence, serving customers in

over 65 countries worldwide. Hernon products are renowned for their durability, strength, and ability to withstand challenging environmental conditions.

Looking ahead, Hernon Manufacturing is poised for an even more remarkable 2024, marked by the launch of its groundbreaking patented Bullet Tip ID technology at SHOT SHOW in January (booth #41357). The new Bullet Tip ID represents the latest innovation in ammunition identification, featuring advancements such as excellent adhesion, scratch-resistant properties, extreme print quality, and uniformity. This solvent-free, single-component, UV-cured coating, known for its cost efficiency with low processing costs per round, cures in seconds.
